Award-winning NextSTEP fiber management system from Wirewerks. (CNW Group/Wirewerks)

Globalinx's 21.5-acre, Tier-III carrier-neutral data center campus will allow Globalinx to provide data center services, colocation services and meet-me-room facilities to customers throughout the region. The Globalinx campus will facilitate the secure interconnection of domestic fiber networks with MAREA and BRUSA subsea fiber cables for communications to Europe, South America and beyond.

Wirewerks' will supply its extensive portfolio of optical fiber connectivity solutions to Globalinx, including their award-winning NextSTEP Technology™ fiber management system. "Wirewerks connectivity solutions, including our super-high density NextSTEP Technology fiber management system, are enjoying great success in Data Center applications across North America," said Jais Cohen, president of Wirewerks. "We are honoured by Globalinx's confidence in Wirewerks and our products, and we look forward to working in partnership with Globalinx on this important project."

Greg Twitt, CEO and Founder of Globalinx commented, "Globalinx evaluated many manufacturers however we were most impressed with Wirewerks and their overall organization. The deciding factor outside of Wirewerks providing Globalinx with a seamless and scalable end to end solution with their high density 4U NextSTEP patch panels, is the level of customer commitment and peace of mind we will benefit from having them as our business partner" said Greg Twitt CEO of Globalinx.

About Globalinx Data Centers

Globalinx Data Centers is a Tier-III carrier-neutral multi-megawatt data center campus in Virginia Beach, Va., developed to facilitate direct connectivity between subsea fiber and terrestrial fiber systems. The four-phased project boasts 287,000 square feet of data center space across a 21.5-acre dedicated site. The campus is fortified with high-security, access to more than 30MWs of power through two substations, and direct access to multiple terrestrial and subsea fiber cable systems. The campus also provides direct access to MAREA and BRUSA subsea cables connecting Virginia Beach to Europe, South America and beyond.
